3.Homepage

A flight is defined by a number and a date, and defines a route from an origin airport to a destination airport. A plane is assigned to a flight and it contains a set of numbered seats.

A span is a part of a route to get from a start airport to a termination airport as part of a specific flight. The start (or termination) airport is called origin (or destination) airport of this span.

For each flight there are several connecting flights (different flights that leave from an intermediate stop closely after its arrival).

4.Ticket Booking

Customers make reservations for specific seats on specific flights. select start and destination stoppage.select date and time,price affordable.Also search offers if any available.Select classes i.e;Business and Economical class.A ticket includes a one-ticket route (one-way ticket) or a two-ticket

route(round-trip ticket).

5.Payments gateway
